Treatment for femoral neck fractures: current evidence.
MANAGEMENT OF HIP FRACTURES IN THE ELDERLY

EVIDENCE-BASED CLINICAL PRACTICE GUIDELINE

 Adopted by the American Academy of Orthopaedic Surgeons
 Board of Directors
 September 5, 2014

This Guideline has been endorsed by the following organizations:

[Logos of endorsing organizations]
Stable undisplaced fractures
Fix or not?
Stable undisplaced fractures
How many screws and which pattern?
Undisplaced subcapital fractures; Age >70
Displaced subcapital fractures; Age 55 to 70
Fixation or arthroplasty?
Surgical approach
Undisplaced subcapital fractures
Bipolar or unipolar?
Hemiarthroplasty vs THR
Cemented vs Uncemented

Cemented
- Taper-slip (Force-closed)
  - Example: Exeter
- Composite Beam (Shape-closed)
  - Example: LubinusSP2

Uncemented
- Fully coated
  - Example: Zweimuller
- Proximally coated
  - Example: Acolade
Polished taper vs Composite beam

Cemented
Taper-slip (Force-closed)
Example: Exeter

Composite Beam (Shape-closed)
Example: LubinusSP2
Intertrochanteric fractures
Stable intertrochanteric fractures
Intertrochanteric fractures
Subtrochanteric fracture
