## Hospital:

First Name	Surname		Patient's postcode	
Date of Birth	Gender		Ethnic Status	
	□ Male □ Female		□ European □ Māori □ Pacific Peoples □ Asian □ Middle Eastern/ Latin American/ African	
Hospital Event Number	Contact telephone	number	☐ Other Ethnicity	
			□ Not elsewhere included	
National Health Index	Payment status			
	□ Public □ Priv	vate ☐ Overseas / other		
Admission via ED of operating hospital		If transferred from another h	ospital	
□ Yes		Name of transferring hospital:		
□ No, transferred from another hospital □ No. in-patient fall		ED/Hospital arrival date/time / / /		
Other/not known	, I		(transferring hospital)	
ED/Hospital Admission (operating hospital)		If an in-patient fracture (time	Record time using 24hr clock using 24hr clock)	
Admission// :hrs		Date / time of diagnosis	_/ / :hrs	
Departure/ :hrs (from ED) Record time using 24hr clock			Record time using 24hr clock	
Usual Place of Residence		Type of ward admitted to		
<ul> <li>Private residence including retirement village</li> <li>Residential care facility</li> <li>Other</li> <li>Not known</li> </ul>		<ul> <li>☐ Hip fracture unit /Orthopaedic ward / preferred ward</li> <li>☐ Outlying ward</li> <li>☐ HDU / CCU / ICU</li> <li>☐ Other / not known</li> </ul>		
Note: If holiday residence/respite care, document u	sual place of residence			
Walking ability pre-admission		Preadmission cognitive stat	us Preoperative cognitive assessment	
☐ Usually walks without walking aids ☐ Usually walks with a stick or crutch ☐ Usually walks with two aids or frame ☐ Usually uses a wheel chair/ bed bound ☐ Not known		☐ Normal cognition ☐ Impaired cognition or known dementia ☐ Not known or recorded	<ul> <li>□ Cognition not assessed</li> <li>□ Cognition assessed and normal</li> <li>□ Cognition assessed and impaired</li> <li>□ Not known</li> </ul> Note: cognitive assessment requires use	
Note: if a person has different levels of mobility on different surfaces then record the level of most assistance			of a validated tool	
Pain Assessment		Pain Management		
□ Documented assessment of pain within 30 minutes of ED presentation □ Documented assessment of pain greater than 30 minutes of ED presentation □ Pain assessment not documented or not done □ Not known or recorded		<ul> <li>□ Analgesia given within 30 minutes of ED presentation</li> <li>□ Analgesia given more than 30 minutes after ED presentation</li> <li>□ Analgesia provided by paramedics</li> <li>□ Analgesia not required</li> <li>□ Not known</li> </ul>		
Bone protection medication at admission  ☐ No bone protection medication				
<ul> <li>Yes, calcium and/or vitamin D only</li> <li>Yes, bisphosphonate (oral or IV) strontium</li> <li>Not known</li> </ul>	, denosumab or teripa	aratide (with or without calcium ar	nd/or vitamin D)	
Pre-operative medical assessment		Side of fracture		
□ No assessment conducted □ Geriatrician / geriatric team □ Physician / physician team □ GP □ Specialist nurse		□ Left □ Right  If bilateral – complete a separate record for each fracture		
□ Not known				
This is in addition to preoperative anaesthetic and orthopaedic review  Atypical fracture		Type of fracture		
□ Not a pathological or atypical fracture □ Pathological fracture □ Atypical fracture		<ul> <li>□ Intracapsular – undisplaced / impacted</li> <li>□ Intracapsular - displaced</li> <li>□ Per / intertrochanteric</li> <li>□ Subtrochanteric</li> </ul>		
See data dictionary if uncertain of definitions			e classed as per/intertrochanteric	

Did the patient undergo surgery	Date & time of primary surgery
□ Yes □ No	/hrs
December of delay > 40 hours	Record time using 24hr clock
Reason if delay > 48 hours  No delay - surgery < 48 hrs Delayed due to patient deemed medically unfit Delayed due to issues with anticoagulation Delayed due to theatre availability Delayed due to surgeon availability Delayed due to delayed diagnosis of hip fracture Other type of delay (state reason) Not known  Note: Delay is calculated from time of presentation to ED of the first hospital or diagnosis of hip fracture for those with a fracture from a in-	Anaesthesia  ☐ General anaesthetic ☐ Spinal / regional anaesthesia ☐ General and spinal/regional anaesthesia ☐ Other — state ☐ Not known
patient fall	
Analgesia (nerve block)	Consultant present during surgery
<ul> <li>□ Nerve block administered preoperative (before arriving in OT)</li> <li>□ Nerve block administered in OT</li> <li>□ Both</li> <li>□ Neither</li> <li>□ Not known</li> </ul>	□ Yes □ No □ Not known
Operation Performed	ASA Grade
□ Cannulated screws (e.g. multiple screws) □ Sliding hip screw □ Intramedullary nail – short □ Intramedullary nail – long □ Hemiarthroplasty – stem cemented □ Hemiarthroplasty – stem uncemented □ Total hip replacement – stem cemented □ Total hip replacement – stem uncemented □ Total hip replacement – stem uncemented □ Other □ Not known	□ 1 □ 2 □ 3 □ 4 □ 5 □ unknown
Postoperative weight bearing status	First day mobilisation
□ Unrestricted weight bearing □ Restricted / non weight bearing □ Not known	<ul> <li>□ Patient out of bed and given opportunity to start mobilising day 1 post surgery</li> <li>□ Patient not given opportunity to start mobilising day 1 post surgery</li> <li>□ Not known</li> </ul>
New Pressure Injury of the skin	Delirium assessment
□ No □ Yes □ Not known  Note: Grade 2 + above during acute admission	<ul> <li>□ Not assessed</li> <li>□ Assessed and not identified</li> <li>□ Assessed and identified</li> <li>□ Not known</li> </ul> Note: assessment of delirium requires use of a validated tool
Clinical malnutrition assessment	
<ul><li>□ Not done</li><li>□ Malnourished</li><li>□ Not malnourished</li><li>□ Not known</li></ul>	
Assessed by Geriatrician in acute phase of care	Date initially assessed by Geriatrician
<ul><li>□ No</li><li>□ Yes</li><li>□ No geriatric medicine service available</li><li>□ Not known</li></ul>	
Specialist falls assessment	Bone protection medication at discharge from operating hospital
<ul> <li>□ No</li> <li>□ Performed during admission</li> <li>□ Awaits falls clinic assessment</li> <li>□ Further intervention not appropriate</li> <li>□ Not relevant</li> <li>□ Not known</li> </ul>	<ul> <li>□ No bone protection medication</li> <li>□ Yes, calcium and/or vitamin D only</li> <li>□ Yes, bisphosphonate (oral or IV) strontium, denosumab or teriparatide (with or without calcium and/or vitamin D)</li> <li>□ Not known</li> </ul>

## Discharge

Date of discharge from acute / orthopaedic ward	Discharge destination from acute / orthopaedic ward	
	☐ Private residence including retirement village	
	☐ Residential care facility	
	☐ Rehabilitation unit public	
	□ Rehabilitation unit private	
1 1	☐ Other hospital / ward / speciality department	
'	□ Deceased	
	☐ Short term care in residential care facility (New Zealand only)	
	□ Other	
	□ Unknown	
Date of final discharge from hospital if known	Discharge destination from hospital health system if known	
//	<ul> <li>□ Private residence (including retirement village)</li> <li>□ Residential aged care facility</li> <li>□ Deceased</li> <li>□ Other</li> <li>□ Not known</li> </ul>	

## Follow Up 120 days

	120 days
Follow up date	//
	Note: record date that follow up was completed
	□ No □ Yes
Alive at 120 days	If discharged from hospital, confirm date of final discharge from hospital system
Residential status	□ Private residence (including unit in retirement village) □ Residential aged care facility □ Rehabilitation unit - public □ Rehabilitation unit - private □ Other hospital / ward / speciality department □ Deceased □ Other □ Not known
Weight-bearing status	<ul><li>□ Unrestricted weight bearing</li><li>□ Restricted / non weight bearing</li><li>□ Not known</li></ul>
Walking ability	□ Usually walks without walking aids □ Usually walks with a stick or crutch □ Usually walks with two aids or frame □ Usually uses a wheel chair/ bed bound □ Not known
Bone protection	<ul> <li>□ No bone protection medication</li> <li>□ Yes - Calcium and/or vitamin D only</li> <li>□ Yes - Bisphosphonate (oral or IV) strontium, denosumab or teriparatide (with or without calcium and/or vitamin D)</li> <li>□ Not known</li> </ul>
Re-operation within 120 days	No reoperation Reduction of dislocated prosthesis Washout or debridement Implant removal Revision of internal fixation Conversion to Hemiarthroplasty Conversion to THR Excision arthroplasty Revision arthroplasty Revision arthroplasty Not relevant Not known
