ANZHFR Hip Festival 2021

The Australian & New Zealand Hip Fracture Registry (ANZHFR) is a bi-national audit of hip fracture care and secondary fracture prevention in Australia and New Zealand. Its objective is to use patient level and facility level data to enable improvements to hip fracture care across both countries.

This 3rd New Zealand Hip Festival in the North Island will offer the opportunity to share best practice, learn from each other and showcase hospitals that are doing well. This will be a forum to identify issues and find solutions that are common across hospitals to help drive improvement in hip fracture care.

Who should attend?

Staff involved with the ANZHFR and hip fracture care.

“BRING ALONG YOUR # NOF DREAM TEAM”
