

Flow of care from presentation with #NOF to surgical fixation

Abbreviations

GORT = Geriatric Orthopaedic Restorative care Team
 GEDI = Geriatric Emergency Department Intervention
 DA = Duty Anaesthetist
 FUN = First Up NOF
 SUN = Second Up NOF

- DEM pathway initiated**
- XR (Hip + CXR) - IDC
 - Femoral nerve block - 12 Lead ECG
 - Bloods - GORT team notified
 - Fast from food, clear fluids OK

- #NOF page (Pt UR + Hospital location) activated by:
- DEM CNC = DEM admissions
 - 4D Team Leader = IHT admissions

Medical admission by GORT or After-hours Med reg

- EVALUATION OF FUN/SUN SPOT CRITERIA**
- ✓ ECG + CXR + Bloods completed and reviewed
 - ✓ Physiological parameters within agreed range:
 - HB > 90
 - Na+ 125-145 mmol/L
 - K+ 3.0- 5.5 mmol/L
 - If diabetic, not in DKA or dehydrated
 - No uncontrolled or acute onset LVF
 - If arrhythmia - ventricular rate < 110 bpm
 - No respiratory sepsis/hypoxia - RA SPO2 > 90%
 - No reversible coagulopathy
 - Not dehydrated with volume depletion
 - Characterisation of systolic murmur: Formal echo only indicated if admitting physician feels it is relevant to improving patient care/outcome
 - Must be suitable for ward-based post-op care
 - ✓ Family discussions + ARP completed
 - ✓ Orthopaedic review + consent
 - ✓ Anaesthetic review + consent
 - ✓ Fasted – solids from 02:00, clear fluids 06:00
 - ✓ Pre-op CHO drink prescribed for 05:30

- Physiological parameters easily correctable:
1. Initiate treatment plan
 2. Parameters re-checked by Medical team at 06:00 e.g. Repeat bloods/ECG

Continue medical workup and discussion/planning between GORT/Orthopaedics/Anaesthetics SMO's

08:30 OR 15 FUN spot

OR 15 SUN spot

Alternative NOF spot
